PASSIONATE LIGHTING...

FEBRUARY
2025
PRICING MANUAL

Why LED :

Lower Energy Consumption
Longer Lifetime
Improved Robustness
Smaller Size

Instant Start : LEDs are ideal for use in applications that are subject to frequent on-off cycling, unlike fluorescent lamps that burn out more quickly when cycled frequently or HID lamps that require a long time before restarting. LEDs are easily dimmable.

Environment Friendly - Does not Contain Mercury.

Solid package of LED can be designed to focus its light. Incandescent and Fluorescent sources require external reflector for the same. Reduced CO2 emission

LEDs are shock resistant being solid state components.

Applications :

- General lighting
- Low energy indicators
- Signage
- Automotive Lighting
- Traffic Lights
- Text and Video Displays.
- Street Lights
- LED Television
- Communication
- Sensors
- Light Matter Interaction

Return & Replacement Policy:

- Replacement of Goods will strictly be considered as per the warranty period mentioned in the above chart.
- Kindly note that the company maintains a strict policy when it comes to accepting returns of high quality saleable materials.
- Only in exceptional or rare cases, with prior intimation or approval, will such returns be considered.
- However, if these materials are returned, a 15% additional deduction will be applied.
- This policy is implemented to ensure effective inventory management and reduce the challenges that arise from accepting unsuitable or outdated items returned by customers.
